AWS Certified Developer – Associate (DVA-C02)

Education

CFGS Multiplatform Development (EQF 5, HND equivalent) Sep 2024 – Jun 2026
Davante MEDAC *Remote, Spain*

Experience

Full Stack Developer (Internship) Mar 2026 – Jun 2026
Master Distancia SAU *Remote, Spain*

- Virtual tour platform for schools (360° tours): built the complete backend with **Express.js** and **TypeScript**, **JWT** authentication (short-lived access tokens, 7-day httpOnly refresh cookies), **RBAC**, cursor pagination and change audit trail
- Secured the API with validation via **Zod**, Helmet and IP-based rate limiting; integrated **MinIO** (S3-compatible) for file uploads with automatic cleanup, documented the endpoints with **OpenAPI** and configured deployment across dev/stage/prod with **Docker** multi-stage, PM2, **GitHub Actions** and Coolify
- On the platform frontend, handled token expiry and built the audit history page end to end
- SPA for an oleotourism company: defined the complete design language (**Tailwind**, typography, components) with pixel-perfect fidelity to the client-provided mockup; additionally, hardened a colleague's email module (**Express** + Nodemailer) with XSS protection, rate limiting and automated booking confirmation to the user
- Acted as branch integrator for the team (10+ developers), reviewing and merging 120+ pull requests across both projects

Projects

Hydrolink | *Spring Boot, React Native, ESP32, AWS* Aug 2025 – Present

- Full-stack IoT smart irrigation platform: ESP32 firmware (PlatformIO and Arduino), REST API in **Spring Boot**, and app in **React Native** (**Expo**) with **TanStack Query**
- Deployed to production on **AWS ECS Fargate**, with containerized services and separate environments for development and production
- Migrated authentication to **AWS Cognito** and device messaging to **AWS IoT Core**, with per-device IoT policies, status ingest via **SQS** and SigV4-signed command dispatch through a typed command gateway
- Implemented device and user management (image, name, location, configurable stations with renaming and role assignment) and per-day scheduling with time windows and overlap detection

Technical Skills

Languages: Java, TypeScript, JavaScript, SQL
Backend: Spring Boot, Spring Security, Spring Modulith, Spring Data JPA/Hibernate, Express.js, Node.js, REST APIs, OpenAPI/Swagger, Flyway
Frontend: React.js, React Native, Expo, TailwindCSS, Zod
Testing: JUnit, Mockito, Vitest, Testcontainers
AI-assisted development: agentic development with Claude Code, review and verification of generated code
Containers and CI/CD: Docker, Docker Compose, GitHub Actions
Systems and infrastructure: Linux, AWS, DigitalOcean, Coolify, Proxmox (self-hosted services)
Databases: PostgreSQL, MySQL, Redis, MinIO
Other: Maven, Gradle, Git, GitHub, Postman, Arduino (C++), PlatformIO, Agile/Scrum, Jira
Spoken Languages: Spanish (native), English (upper-intermediate)

Additional Training

Spring Boot 4, Spring Framework 7: Beginner to Guru, Udemy Aug 2026
Intermediate React Native, v2, Master.dev Jun 2026
API Design in Node.js, v5, Master.dev Apr 2026
Java Masterclass 2025: 130+ Hours of Expert Lessons, Udemy Dec 2025
